

// FEATURES

- A compact drop-in bench to be mounted in an existing work surface.
- 6 standard sizes.
- Wide range of filtration options.

// CONSTRUCTION

- 2mm steel, fully welded
- Powder coated

// APPLICATIONS

Designed for dust and fume extraction applications; complete with integral filter system.

Typically for manual processes but can be integrated with other systems.

FEATURES

// THE COMPACT SOLUTION FOR YOUR SPACE

The DB range is an ideal space saving design when using a freestanding AirBench model is not convenient. AirBench DB can be easily fitted to an existing worktop allowing integration with your own environment.

// FILTER OPTIONS

A wide range of standard filter options allows us to specify the most appropriate configuration for every application.

We also offer a selection of alternative models for seated applications, or for welding and grinding type processes - see other publications for details.

// EASY FILTER ACCESS

Simple access to filters via perforated top allows for easy maintenance and fast filter changes.

// CONTROLS

Ranging from a simple on/off switch on a single unit, to timed run or centrally controlled, daisy chained systems for multiple installations.

Speed control is available as a simple option. Every unit is fitted with filter condition monitoring via a pressure loss gauge.

// VENTILATED TOP

The DB range features a ventilated area of most of the top surface; meaning you can work anywhere on the bench and still have effective extraction.
