

## // FEATURES

- Modular system
- Cross-draught extraction
- Pulse Clean Filters,
- HEPA option

## // CONSTRUCTION

- 2mm steel, fully welded
- Powder coated
- Easily reconfigured

## // APPLICATIONS

Designed for larger parts that cannot be readily handled on an AirBench.

VertEx can be configured for dust or fume applications.

## FEATURES

### // MODULAR SYSTEM

The unique VertEx modular system allows for rapid build and rapid reconfiguration; or construction of large extracted walls in very short timescales.

### // FILTER OPTIONS

High volume filters with compressed air cleaning system, designed for high volumes of dust - non-explosive dusts only.

Optional H13 HEPA after filter for hazardous dusts.

### // HIGH EFFICIENCY FANS

Our low energy fans allow us to move large volumes of air, at low power.

EC Technology permits simple low voltage control, or central management. Single or three phase versions are available at no additional cost.

### // CONTROLS

Ranging from a simple on/off switch on a single unit, to centrally controlled, daisy chained systems for multiple installations.

Speed control is available as a simple option. Every unit is fitted with filter condition monitoring via a pressure loss gauge.

### // BUILD A BOOTH

From a simple extracted wall to a full height extracted booth, constructed within a day using the VertEx modular approach.
